

KIRUBA G

To obtain a frontend development internship where I can apply my skills in HTML, CSS, JavaScript, and React to contribute to real-world projects, gain hands-on experience, and grow as a web developer in a collaborative environment."

Projects

Todo List Web Application (React)

- Built a dynamic task management application using React.js
- Implemented add, delete, and update functionalities for tasks
- Used React hooks like useState for state management
- Designed a responsive and user-friendly UI

AI Resume Analyzer (Skillscan-AI)

- Developed a web application to analyze resumes and identify key skills
- Implemented file upload functionality and extracted text from PDF files
- Designed keyword-based matching system to evaluate resume content
- Generated a basic resume score and highlighted missing skills
- Built frontend using React.js and backend using Node.js
